PROFILE

I am a dedicated full stack developer with a solid technical background. My goal is to design user-centered web experiences that are fascinating, engaging, and enjoyable to explore. I'm committed to providing easy-to-use, visually appealing interfaces with a keen eye for design and a solid basis in programming. By staying current with the latest web technologies, I am able to develop dynamic, responsive websites that engage users across a wide range of devices. With experience in JavaScript and modern frontend frameworks such as React, Nodejs, Express, and MongoDB, I succeed in collaborative environments.

EDUCATION

B. Sc. in Computer Science *Kathmandu University*	02/2021 – present Dhulikhel, Kavrepalanchok
+2 Science *Kathmandu World School*	06/2018 – 11/2020 Gundu, Bhaktapur

SKILLS

Javascript	React
Node.js	Express.js
MongoDB	C++
Python	Collaborative Work
Figma	

LANGUAGES

English Business Level Proficiency	**Japanese** JLPT N3 Proficiency

INTERESTS

Full Stack Development | DevOps | Data Science | Machine Learning and Neural Networks

COURSES

React Frontend Development Course *DynoAcademy*	10/2023 – 02/2024
MERN Stack Development Training *Broadway Infosys*	04/2024 – 07/2024

PROJECTS

MovieMate 🔗   04/2024 – 07/2024
https://github.com/prg6useless/MovieMate.git
MovieMate is a web application to buy movie tickets. The app was developed using MERN Stack. The frontend is developed using react and react-bootstrap along with react-redux for state management. Backend is developed using NodeJS and ExpressJS by impelementing RESTApi and MongoDB for storing data.

Senti-Surfer 🔗   02/2023 – 06/2023
https://github.com/prg6useless/E-commerce-website
A chrome extension that analyses the comments of youtube videos and provides their sentiments along with data visualizations. The extension was developed using React Typescript and Python.

E-Commerce Website (React) 🔗   07/2023 – 08/2023
https://github.com/prg6useless/E-Commerce_React
An E-Commerce Website made using React, Commerce.js, and Stripe with dummy
payment gateway. All of the backend is handled by Commerce.js and Stripe.

CIAO - Code In Art Out 🔗   07/2022 – 11/2022
https://github.com/prg6useless/ciao
CIAO is a web app that generates art based on the user's choice. The app also
includes a simple user authentication and authorization. The user can choose the
type of art to work on and can also download the generated art. The app was
developed using React, Nodejs, ExpressJs and MongoDB (MERN Stack).

Sirani 🔗   07/2021 – 09/2021
https://github.com/prg6useless/sirani.git
A mental health app which tracks the sleep and mood of the user. This app is
developed using Qt, a C++ framework.

CERTIFICATES

- MERN Stack Development
  Training, Broadway Infosys
